FAMILY CHILD CARE

Our Approach

We aim to ensure that children have a healthy and stimulating early care education setting by offering play-based curriculum which is tailored to a child's individual needs along with structured activities, providing children appropriate stimulation, learning and socialization opportunities.

Creative Curriculum

We focus on positive relationships, and promote progress and learning in all developmental areas such as social, emotional, physical, language, and cognitive. The curriculum balances teacher-planned and child-initiated activities and emphasizes children's strengths, interests, needs, and learning styles as well as reflects the influence of culture, family, and community in the child's life. The curriculum is inclusive of children who are dual-language learners, children with disabilities, and advanced learners. STEM practices are incorporated into our curriculum; which is an introduction to the five disciplines of Science, Technology, Engineering, Art and Math. Children can learn and explore in an environment that encourages problem-solving, innovating, and creating. Developmental Screenings, assessments, and behavior

Management Support

Our goal is to ensure that all children are making continuous progress in all areas of development.

Assessments results support planning for the curriculum, planning for each individual child's development, and are included in the information we share with families during regularly scheduled parent conferences.

We also implement evidence-based screening tools. Screening young children is an effective, efficient way for professionals to check a child's development, help parents celebrate their child's milestone. It is a step forward identifying children with delays or disorders in the critical early years, before they start school.

In addition, we support the healthy social and emotional development of all children. The program provides support and services for the child and entire family, as well as referrals and resources that will help meet their needs.

Our goal is to support children's development of self-regulation, increase social competence, and to develop a peaceful and respectful approach with other classmates. We use the following techniques to encourage self-discipline: Prevention, Redirecting, Encouraging, Modeling, Discussing, and Problem-solving.
